

IMPORTANT **INSURANCE INFORMATION**

We recommend screening tests and/or education classes as a preventative measure due to age or family history. If you elect to attend one of our classes or have a test done for any reason, we cannot guarantee your insurance will pay for these services.

We do precertify with your insurance company any tests we order, if necessary. This does not guarantee payment. YOU must verify with your insurance company that routine services are paid.

You must also check to see if the facility charge where the procedure is performed, if other than BVMA, will be covered. We do not do this for you. We only precertify the doctor's portion of the fee.

We sometimes must send out labs to another facility or the facility we refer you to may send out labs. We do not send out to special labs as specified by insurances.

You are responsible for the facility charges as well as the doctor's fee whether your insurance makes payment or not.
